DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "separation area," in each of the independent claims is not clear, because it is not clear how one would distinguish such a separation area from the two regions being separated, the "first conductivity type impurity region" and the "second conductivity type impurity region." Examiner is assuming that the separation area is simply an area of the substrate, having the same doping as the substrate, and that the two conductivity regions are more heavily doped than the substrate. (This interpretation is suggested by the language of claims 3 and 13, "the separation are of the silicon substrate" or "the separation area of the semiconductor substrate.") With this interpretation, the separation area is distinguishable from the two impurity regions because of the differences in doping. However, the claim language, read literally, does not require a difference in doping, and appears to leave open the possibility that the region identified as a "separation area" could have exactly the same doping concentration as one of the two impurity regions. So it is not clear whether the term "separation area" or "separation area of the . . . substrate" means that the area has the same doping as the substrate.
